APPLICATION FOR 2026 BNY MELLON SUMMER INTERNSHIP – ENGINEERING

Dear Hiring Team,

I am excited to apply for the 2026 Summer Internship Program – Engineering at BNY Mellon. I'm a pre-final year Information Technology student at Pune Institute of Computer Technology (CGPA: 9.6), with hands-on experience in full-stack development and scalable backend systems.

Currently, I'm interning remotely at Plasma Tech, Mumbai, working on an AdTech platform using React.js and Python FastAPI. Previously, I built a full-stack e-commerce platform at a stealth startup and led the development of live projects like ShopWavelength, KPure, and AI tools like NeuralDocs.

I'm passionate about engineering meaningful systems and resonate deeply with BNY Mellon's culture of innovation and impact. I'm proficient in technologies like AWS, Docker, MongoDB, PostgreSQL, and thrive in agile environments.

I am open to relocation and fully available for the May 2026 internship. I would be thrilled to contribute and grow with your team.

Aayush Agrawal
